

Starling Word Tracker

Meet the Starling - the wearable word counter. Pair the Starling with our free smart phone app, clip it to your child's clothing, and start talking! In real-time, the Starling processes the audio signals from your verbal engagements, turning them into data that tells you just how many words your baby is being exposed to. Easily set daily word goals and complete weekly challenges to improve your word count. The Starling will help you succeed with fun, verbal activity prompts and helpful tips. No bigger than the size of a pacifier, the Starling is a water and drool proof device that has a four day battery life. With the ability to count all languages and provide age-specific activities for children, the Starling is a valuable addition to any family.

Starling circulates for
ONE WEEK

For Children ages
Birth - 3 years
